

A SOLUTION DESIGNED FOR PERFORMANCE AND SIMPLICITY

Millenium self-supporting stairs and walkways provide a reliable and efficient solution for safe rooftop movement. They enable seamless access between roof levels and around mechanical equipment, without compromising roof membrane integrity.

Thanks to their 100% self-supporting design, installation is fast and requires no roof penetration.

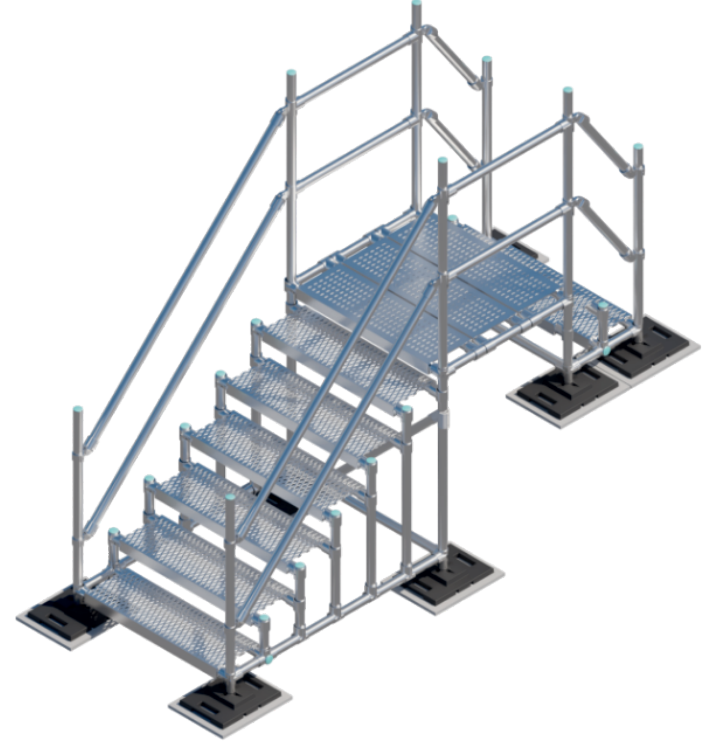

WARRANTY

10 YEARS

On all components

APPLICATIONS

- Access between different roof levels
- Crossing obstacles (ducts, expansion joints, cables, etc.)
- Safe access to rooftop equipment (water towers, chimneys, mechanical units)
- Secure circulation for maintenance and operations

SELF-SUPPORTING STAIRS AND WALKWAYS

INNOVATIVE AND SAFE SOLUTIONS FOR
ROOFTOP ACCESS AND CIRCULATION

DESIGN AND MANUFACTURING

All systems are manufactured from high-quality aluminum to ensure long-term strength and durability. Structural components include 6061-T6 aluminum tubing, robust counterweight bases, and high-performance aluminum alloy connections.

Production is carried out in an ISO 9001 certified facility, with CWB-certified welding, ensuring superior quality, consistency, and traceability.

KEY BENEFITS

- Fully self-supporting system – no roof penetration required
- Fast and simplified installation
- Modular design adaptable to all roof configurations
- Lightweight structure safe for all roofing systems
- Exceptional durability – maintenance-free
- Slip-resistant steps for enhanced safety
- Available in natural aluminum or powder-coated finish

ADDED VALUE FOR YOUR PROJECTS

Millenium self-supporting stairs and walkways integrate seamlessly into both new construction and retrofit projects. They enhance safety, reduce risk, and improve rooftop accessibility while simplifying design for professionals.
