WHY CHOOSE DISCRETION?

In many municipalities and cities, regulations require rooftop mechanical equipment to be concealed from public view.

The DISCRETION™ system was developed to meet these requirements while providing an attractive architectural finish that seamlessly integrates with the building envelope.

For projects requiring sound attenuation, the system can also be configured in an acoustic version to reduce noise emissions from mechanical equipment.

KEY BENEFITS

- Fully modular system, configurable to meet project requirements
- No penetration of the roofing membrane
- Compatible with flat and low-slope roofs
- Noise reduction available with acoustic version
- Quick installation, even in confined spaces
- Architectural finish available in natural aluminum, white, or custom colors
- All engineers working for Millenium hold the Professional Engineer (P.Eng.) designation in structural engineering, enabling them to design safety equipment projects across all Canadian provinces and ensuring professional design for your projects.

BENEFITS FOR ARCHITECTS

- Clean architectural appearance
- Customizable configurations and finishes
- Seamless integration with the building design
- Available in natural aluminum, white, or custom colors
- Minimal visual impact on the roof and enhanced overall building aesthetics

BENEFITS FOR PROPERTY MANAGERS

- Durable construction and maintenance-free operation
- Quick installation with minimal disruption
- Long service life and enhanced building appearance
- Protection of the roof aesthetics, property value, and roofing systems
- Optional acoustic performance available

MILLENIUM, BUILDING ENVELOPE, SYSTEMS AND COMPONENTS

Across Canada, Millenium supports architects, engineers, contractors, and building owners with innovative solutions in rooftop safety, architectural design, and building envelope systems.
