

PRODUCT DESCRIPTION

The Millennium freestanding warning line is a safety system designed to define work zones on rooftops in order to prevent fall hazards, in compliance with applicable provincial regulations.

ADVANTAGES

- ✓ Durable, robust, and maintenance-free system
- ✓ Installation without roof membrane penetration
- ✓ Compatible with flat and low-slope roofs
- ✓ Suitable for installation in restricted areas
- ✓ Available in natural aluminum or painted finishes

USES

- Modular system adaptable to various project requirements
- Delineation of work areas on roofs with slopes $\leq 15^\circ$ (3/12)
- Creation of safe circulation corridors
- Establishment of a 2 m buffer zone from fall hazards

COMPLIANCE AND STANDARDS

Compliant with the Safety Code for Construction Work (RSST Quebec – Articles 33.5 and 354.1). The system must be installed at a minimum distance of 2 m from roof edges, with flags spaced at a maximum of 2 m and posts spaced between 2.4 m and 2.5 m.

All welding operations must comply with Canadian Welding Bureau (CWB) certification requirements. A manufacturer's certification must confirm that 6061-T6 aluminum tubes are extruded in accordance with ASTM B-221 by an ISO 9001 certified Canadian company.

The system includes a one (1) year warranty on paint finish and a ten (10) year warranty on all materials, starting from the date of purchase.

TECHNICAL CHARACTERISTICS

- Cable height: 0.7 m to 1.2 m
- Galvanized coated steel cable (Ø 6 mm)
- 6061-T6 aluminum posts
- Counterweights: 22.7 kg (50 lb) rubber
- High-visibility PVC-coated polyester flags

MAIN COMPONENTS

- Aluminum posts
- Galvanized coated cable
- High-visibility safety flags
- Stackable counterweights
- CSA-certified mechanical connectors
- Roof protection mats

COMPLEMENTARY EQUIPMENT

Complete range including guardrails, permanent anchors, lifelines, and architectural screen walls.
